

*Fig. 1*

A diagram illustrating a cross-section of a cell membrane. The membrane is composed of a phospholipid bilayer, with hydrophilic heads (represented by circles) and hydrophobic tails (represented by wavy lines). A central cavity is labeled "GAS". Various components are numbered for identification:

- 1: A bracket on the left side of the membrane.
- 2: A phospholipid head.
- 3: A phospholipid tail.
- 4: A phospholipid head.
- 5: A phospholipid tail.
- 6: A phospholipid head.
- 7: A phospholipid tail.
- 8: A phospholipid head.
- 9: A phospholipid tail.
- 10: A phospholipid head.
- 11: A phospholipid tail.
- 12: A phospholipid head.
- 13: A phospholipid tail.
- 14: A phospholipid head.
- 15: A phospholipid tail.
- 16: A phospholipid head.
